The Relevance, Efficacy & Morality Of Potential COVID-19 Measures  
For The Aviation Industry

An Evidence-Backed Analysis & Counter Proposals

Video Summary

<https://www.bitchute.com/video/2TT9oP9JTNHi/>

(Removed) <https://youtu.be/gHDC4dLTTMk>

## Coronavirus General

This section intends provides an outline on positions such as:

- 1) The Coronavirus 'Pandemic' Is Not As Severe As Mass Perception Indicates
- 2) International Coronavirus Data Does Not Validate Current Government Strategies Or Actions
- 3) The Legitimacy Of COVID-19

It then logically follows whether potential measures for the Aviation Industry are relevant or necessary. This report will lay out the sceptic's case for a 100% return to normal – and argue that any new measures due to COVID-19 are indeed *not necessary*, and in some cases, *not moral*.

### 1) **Does The Covid-19 Coronavirus Really Exist?**

[https://www.lewrockwell.com/2020/12/no\\_author/does-the-covid-19-coronavirus-really-exist/](https://www.lewrockwell.com/2020/12/no_author/does-the-covid-19-coronavirus-really-exist/)

The main take-away from this report, is that an isolated, exact COVID-19 sample has not been discovered or recorded. How can things such as tests, and vaccines then hold any value or be effective due to the specific nature of protein interactions?

### 2) **Mutated COVID Virus Marketed to Justify New Lockdowns**

<https://www.lewrockwell.com/2021/01/joseph-mercola/mutated-covid-virus-marketed-to-justify-new-lockdowns/>

In addition to point (1) – any GCSE Biology student can tell you that viruses mutate. On a flight with 200 COVID-19 infected people, by the end of the flight you could have 200 new COVID-19 variants.

How is it possible for tests or vaccines to *ever* catch up with virus mutations, and therefore be accurate in diagnosis or treatment?

### 3) **The Greatest Hoax Ever Perpetuated On An Unsuspecting Public**

<https://www.lewrockwell.com/2020/12/joseph-mercola/the-greatest-hoax-ever-perpetuated-on-an-unsuspecting-public>

Here we have an overview on the illegitimacy, bad practice and over-reaction of many things related to COVID-19 – fully sourced from numerous medical experts and professionals.

- 4) **Ivor Cummins Presents Bombshell International Coronavirus Data**  
[https://www.youtube.com/watch?v=3cigicrA504&feature=emb\\_logo](https://www.youtube.com/watch?v=3cigicrA504&feature=emb_logo)

**Ivor Cummins & Reid Sheftall Give Coronavirus Statistic Insights**

<https://thefatemperor.com/ep103-reid-sheftall-md-comprehensively-decoding-the-viral-issue-pt-1-of-2/>

These two videos examine COVID-19 data in concise detail. The first video covers many areas – and main take-aways would be:

- Lockdown & mask wearing are useless
- COVID-19 Outbreaks are seasonal in nature, and are not affected by government control measures
- The COVID-19 outbreak is less severe than viruses in previous decades, and no measures were introduced then

- 5) **Asymptomatic People Do Not Spread COVID-19**  
<https://www.lewrockwell.com/2020/12/joseph-mercola/asymptomatic-people-do-not-spread-covid-19/>

Why should healthy people be at all limited or coerced in any way by COVID-19 measures? Be it forced to have COVID-19 tests, forced to have vaccines, forced to social distance, or forced to wear face masks?

No danger is posed to the vulnerable from asymptomatic people, thus there is no reason for any of the above measures – and no reason for these people not to return to normality.

## A Numbers Perspective

To set the stage for this report – an overview of the COVID-19 data and death statistics must be undertaken. These will be UK/England figures only.

We aim to consider:

- The severity of COVID-19 compared to mass-perception
- The way numbers surrounding COVID-19 are inaccurate & misleading

### 1) **Inflated & Inaccurate COVID-19 Death Totals**

Number are being inflated (or at least, incorrectly reported) due to the ‘\*Deaths for any reason within 28 days of a positive test’ tagline that comes with any report of the COVID-19 deaths.

#### **COVID-19 Data Is A 'Travesty'**

[https://www.lewrockwell.com/2020/12/no\\_author/the-covid-19-data-is-a-travesty/](https://www.lewrockwell.com/2020/12/no_author/the-covid-19-data-is-a-travesty/)

To put forth the analogies;

Take your great aunt Enid, age 82. She contracted COVID-19 – but then on her weekly shop, is hit by a bus and dies. She would test positive for COVID-19 and therefore would be counted in this ‘100k’ figure total.

Take you oldest friend, Brian, age 85. Has been long suffering with prostate cancer, and is in the hospital to see out his final days. Due to his weakened immune system, he catches COVID-19 in the hospital. He dies a day later and therefore tests positive for COVID-19.

Both scenarios offer just one aspect of how the COVID-19 death totals are subject to inaccuracy. Neither Enid nor Brian died of COVID-19, but they are being counted in the death total.

### 2) **Flawed Testing Methods**

This will be explored in detail in the following section. However this will provide a brief overview. How can policy and measures be implemented on a good basis if we cannot even get accurate data from tests?

#### **Doctor Explains What Is Wrong With COVID-19 Case Counts**

[https://www.lewrockwell.com/2021/01/no\\_author/doctor-explains-whats-wrong-with-covid-19-case-counts/](https://www.lewrockwell.com/2021/01/no_author/doctor-explains-whats-wrong-with-covid-19-case-counts/)

### 3) Average Age Of Death

One must also consider the average age of death of COVID-19 victims. The table below (resource [1]) clearly shows that COVID-19 is not a significant threat for the younger population.

|         | Median             | Mean            |                    |                 |
|---------|--------------------|-----------------|--------------------|-----------------|
|         | Involving COVID-19 | Due to COVID-19 | Involving COVID-19 | Due to COVID-19 |
| Persons | 83                 | 83              | 80.3               | 80.4            |
| Male    | 81                 | 81              | 78.6               | 78.7            |
| Female  | 85                 | 85              | 82.3               | 82.5            |

### 4) Deaths Of All Ages By Pre-Existing Condition

Further to the point above, now let us examine the death figures in more detail – specifically ‘Deaths By Pre Existing Condition’.

| Age group    | Pre existing condition |       |  | Total  |
|--------------|------------------------|-------|--|--------|
|              | Yes                    | No    | Unknown presence of pre-existing condition |        |
| <b>Total</b> | 71,138                 | 3,111 | 0  | 74,249 |
| 0 - 19 yrs   | 25                     | 6     | 0  | 31     |
| 20 - 39      | 421                    | 68    | 0  | 489    |
| 40 - 59      | 4,571                  | 497   | 0  | 5,068  |
| 60 - 79      | 26,786                 | 1,283 | 0  | 28,069 |
| 80+          | 39,335                 | 1,257 | 0  | 40,592 |
| Unknown age  | 0                      | 0     | 0  | 0      |

This table tells us:

Only 3,111 people as of (4<sup>th</sup> Feb 2021) in England have died of COVID-19 **alone**.

Alternatively, COVID-19 **alone** has killed 0.0046% of the English population as of this date. A healthy person is very unlikely to die of COVID-19.

And due to point [1] we know that the total of 71,138 for those with a pre-existing condition -died within 28 days of a positive test (as can be confirmed by [england.covid19dailydeaths@nhs.net](mailto:england.covid19dailydeaths@nhs.net)) – these numbers are subject to contention as to the actual cause of death.

You can also gather that out of the total deaths in England (74,249) that 68,661 of them (92%) were age 60 or older. This virus is not a significant threat for the younger population.

5) **NHS England Figures: COVID 19 Weekly Total Deaths Archive**

<https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-daily-deaths/weekly-total-archive/>

We must also take into consideration that the pre-existing condition may be unknown, or undetected. This can be something as simple as a vitamin deficiency, or undiagnosed immune system disorders.

6) **COVID-19 Death Statistics Compared To Previous Virus Outbreaks**

This video (starting at the given time) will cover data from previous years for different countries, and show that 2020 was not a significant year in terms of deaths compared to previous decades.

If we had no control measures then, why now, must we take them, given the data for COVID-19 in 2020 clearly shows it is not as severe as mass perception may indicate?

**Ivor Cummins Presents Bombshell International Coronavirus Data**

<https://youtu.be/3cigicrA504?t=1159>

This next article provides a view that death numbers have been 'repackaged' as COVID-19 – and also echoes the point that COVID-19 seems not to have caused excess mortality in 2020.

**COVID-19 Deaths**

<https://www.lewrockwell.com/2020/12/ion-rappoport/johns-hopkins-study-explodes-covid-death-hoax-its-re-labeling-on-a-grand-scale/>

7) **Extra Resources**

[1] The Office Of National Statistics: Average age of death (median and mean) of persons whose death was due to COVID-19 or involved COVID-19, by sex, deaths registered up to week ending 2 October 2020, England and Wales.

<https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/deaths/adhocs/12376averageageofdeathmedianandmeanofpersonsw hose death was duetocovid19orinvolvedcovid19bysexdeathsregistereduptoweekending2october2020englandandwales>

## Testing Methods

This section provides links to many resources explaining the inaccuracy and ineffectiveness of COVID-19 test measures – further bolstering the evidence and analysis in previous sections.

Dr Pascal Sacre's Paper contains an in-depth run down of many aspects of the PCR test. One key point is that the creator of the PCR test criticised its use in detecting infection cases of a virus.

### **Dr Pascal Sacre's Paper**

[https://www.lewrockwell.com/2020/11/no\\_author/the-covid-19-rt-pcr-test-how-to-mislead-all-humanity-using-a-test-to-lock-down-society/](https://www.lewrockwell.com/2020/11/no_author/the-covid-19-rt-pcr-test-how-to-mislead-all-humanity-using-a-test-to-lock-down-society/)

The disadvantage of PCR tests is that they can be run at extremely high cycle numbers. Given a high enough cycle number, you could get a positive test for anything you desire.

This cycle number refers to the amount of duplication cycles of an original sample. The idea is that if a piece of COVID-19 DNA/RNA/mRNA is present in a sample, the test can duplicate it, and duplicate it, until it is detectable to prove that COVID-19 was present in the sample, and therefore the patient was infected with it.

## Coronavirus Vaccine & Vaccine Passports

By the own admittance of government scientists, and information from mainstream media: the vaccine does not provide 100% immunity, prevent you catching COVID-19, or prevent the transmission to other people – why would vaccine passports then be useful, or necessary?

## Conclusion & Proposals

To date the aviation industry has accepted the British government's response to Coronavirus. There is an enormous wealth of evidence that the response is medically & strategically flawed. Indeed on many issues diametrically opposed to both original & current World Health Organisation advice.

Securicare has compiled an in depth dossier of expert international scientific opinion covering masks, vaccines, social distancing, virus mutations, mortality statistics & many other aspects of the Coronavirus response. None of this research is sponsored by governments or pharmaceutical companies. There is therefore no hidden agenda.

It is the view of Securicare that many government responses have been scientifically flawed, biased or the result of a hidden political agenda. This has been left un-debated or challenged in any way by main stream media who have simply accepted the government narrative.

Hospitality, aviation industries & high street retail have been the hardest hit. The aviation industry should challenge this narrative before it is too late to do so.

We offer a recommendation of an articulate expert to challenge the status quo; an official aviation spokesperson. Recruiting Michael Yeadon would be a big first step.

Compliance to a political agenda will inevitably fail as goal posts are moved on a weekly basis.

Time is running out for our industry.

In the face of the evidence outlined in this report, our proposals for the industry are as follows:

- 1) No Mandatory Testing
- 2) No Mandatory Vaccinations
- 3) No Mandatory Face Covering
- 4) No Mandatory Social Distancing
- 5) No Personnel / Client / Customer Or Any Other Quotas On Numbers Of People

We would not only be ignoring large amounts of evidence that these things are in the main, useless at stopping a statistically irrelevant virus - but would also be performing discrimination against our customers, clients and personnel if we were to impose such measures. Not to mention affecting the bottom line of all of our businesses.

We do not accept *'the new normal'* – and instead, fight for *'a return to normal'*.
